EDUCATION

University of California, Santa Cruz

Santa Cruz, CA

Bachelor of Science in Computer Science, Minor in Technology Information Management

Anticipated June 2027

- **Relevant Coursework:** Data Structures and Algorithms, Full Stack Web Development I & II, Principles of Computer Systems Design, Computer Architecture, Computer Networks

PROJECTS

KitGrail.com

March 2026 – Present

- Developed a full-stack web application marketplace for vintage soccer jerseys, with separate admin and seller apps
- Built with Next.js, React, GraphQL, and PostgreSQL, using Stripe for payments and Google OAuth for authentication, deployed using AWS
- Collaborated in a team of four, integrating a CI/CD pipeline with regular deployment to the web using Docker containers

SafeFlex | CruzHacks Hackathon

January 2026 – Present

- Built a wearable device for post-surgical physical therapy that tracks and validates repetition form in real time using sensor data
- Hackathon prototype created with FastAPI, HTML, CSS, and JS; second prototype with Swift and SwiftUI
- Collaborated in a team of four, set up a CI/CD pipeline, and competed against 100+ teams at CruzHacks
- Awarded university funding to develop a second prototype with Bluetooth, and iOS integration

Monty Python Trained Generative Transformer

December 2025

- Built a generative transformer model using PyTorch and TensorFlow, trained to generate Monty Python: Holy Grail script
- Optimized model inference for Apple M2 Silicon and tuned temperature hyperparameter to improve output coherence
- Implemented self-attention mechanism using aggregated weight matrices for training

EXPERIENCE

Tech4Good Lab

Santa Cruz, CA

Lab Member

June 2026 – Present

- Built web development skills in Angular, TypeScript, HTML, and CSS through Tech4Good's collaborative, project-based learning program
- Contributed to a large-scale software project while engaging in peer mentorship and community-driven learning

University of California Office of Admissions

Santa Cruz, CA

Special Events Staff

February 2024 – March 2025

- Professionally represented UCSC by providing critical first impressions to prospective students and family
- Delivered campus tours and tabling sessions, communicating extensive knowledge of UCSC programs and resources
- Managed tour scheduling system, handling check-ins and tour group coordination using Slate

Amnesty International

Santa Cruz, CA

Canvasser

March 2024 – June 2024

- Canvassed an average of 100 households per day, averaging 3 sign-ups per day, exceeding the company average of 2
- Increased weekly new member count by approximately 20% through effective community outreach
- Built rapport with communities across diverse backgrounds, addressed concerns, and converted contacts into recurring donors

SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS, Swift, Scala

Frameworks & Libraries: React, Next.js, Node.js, FastAPI, SwiftUI, PyTorch, TensorFlow, GraphQL, RESTful APIs

Tools & Platforms: PostgreSQL, Git, Docker, CI/CD Pipelines, AWS

Personal: Bilingual (Native English and Spanish), strong verbal communication, team coordination and collaboration
